

Sinclair Broadcasting's license should be reviewed regarding their recent demand to their stations that they must air a purely political smear piece on John Kerry. The air waves belong to the public and too many companies have forgotten that. We will take back the license of any company that does not live up to the standards under which the license was granted. We will also see to it that anyone at the FCC who does not enforce the standards will be removed.

Sincerely,

Ron and Marianne Griffeth
